Unrivalled Excellence, Unparalleled Partnership

ENSCO 107 completed ahead of schedule

Keppel FELS stands tall on our quality motto of "On Time, On Budget" in executing every project.

ENSCO 107 is a masterpiece in design and quality. It is also a hallmark of high standards in health, safety and the environment with its zero-accident record.

The first of six jackups to be delivered during the year, the ENSCO 107 is also the eighth jackup drilling rig that Keppel has built in partnership with ENSCO.

Designed by the R&D arm of Keppel Offshore & Marine, this KFELS B Class rig is the market standard for the premium class jackup drilling rigs. To date, 40% of the world's jackup rigs on order are being built on this design.

Keppel FELS has done it again with its "Can Do!" spirit!
